1. Claims 2, 5-15, 17-31, and 33-72 are pending in this application.

Claims 1, 3-4, 16, 32 and 73-83 have been cancelled.

2. The rejection of claims 1-83 under 35 USC 101 as claiming the same invention as claims 1-83 of prior US Patent No. 6,680,178 B2 has been withdrawn in view of the amendment to the claims submitted March 9, 2005.

3. NEW GROUNDS OF REJECTION:

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2, 5-15, 17-31, and 33-72 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-112 of U.S. Patent No. 6,680,178 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because both inventions claim materials having identical or closely analogous chemical structures. Also, both inventions claim methods for assaying the presence of enzyme active protease in a sample using the

same or obvious variations of the active method steps. In addition, both inventions claim libraries of fluorogenic peptides having identical or closely analogous chemical structures. It is also noted that both inventions claim methods for assaying for the presence of selected microorganisms. Further, at the time this invention was made it would have been obvious to one having ordinary skill in this art to provide the instant invention in view of the inventions claimed in U.S. Patent No. 6,680,178 B2. Therefore, there is substantial overlap of the subject matter claimed in both inventions.

- 4. No claim is allowed.
- 5. Applicant's submission of the requirements for the joint research agreement prior art exclusion under 35 U.S.C. 103(c) on March 21, 2005 prompted the new ground(s) of rejection under 37 CFR 1.109(b) presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.02(I)(3). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
